

### Surveys, Smores & Sharing!

**"Would you like to roast a smore?"** This has become a familiar question to many Mesa State students this semester. It may sound strange, but setting up a patio fire pit in the middle of campus has been a great way to meet students. Earlier this month we conducted a spiritual interest survey to meet new students and receive filtered information on who might be interested in talking further about Jesus Christ or spiritual issues. We set up the fire pit right alongside the survey table and offered students smores as they walked by. **Sean** happened to walk by the fire as we were just finishing up. By this time it was about 7:30 p.m. and getting fairly chilly out, so Sean stopped for a moment to

warm up. We all started chatting with Sean and he asked, "So what are you guys doing out here?" **This led to an hour and a half long conversation about a variety of spiritual issues including the Gospel being shared by Ricardo, Kyle and Evan!** Sean later commented, "You guys are real. You are not fake Christians." Kyle was able to answer some questions for Sean that no one had been able to give a real answer for including two mormon missionaries the night before! "That is the best answer someone has been able to give me," commented Sean. Praise God for the seeds that were planted in Sean's life! Please pray that Sean will trust in Christ alone as his Savior. **Also, please pray for the follow up of the many surveys we took that night!**

### Creation / Evolution Forum

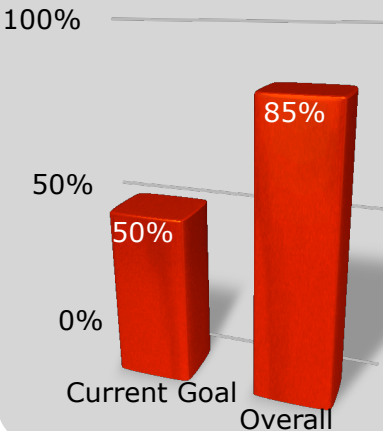

One of the biggest barriers to the Bible and the Gospel among today's college students is the teaching of evolution! While science professors to English professors talk about evolution, most students have not heard any evidence that **Darwin was wrong!**

On February 10th, we partnered with the Alpha Omega Institute to hold a forum on campus examining the evidence. AOI did a great presentation for over an hour and answered another 45 minutes worth of questions! **We had nearly 70 people show up, with around a third of those being students we'd never met before!** Please pray that this scientific evidence for creation will help students think critically and ultimately point them to a relationship with Jesus Christ!

**There is a large "Praise Darwin" billboard just a few miles from the Mesa State campus.** February 12th also happened to be the 150th anniversary of Darwin's "Origin of Species." We weren't thinking of those two things when we originally decided to hold this event. **Praise God for the strategic timing of this presentation!**

### Monthly Support Meter

We have been greatly encouraged as we've added new prayer and financial partners.

Our current goal could be met with **10 new financial partners at \$50 per month!**

### Please Pray...

- ☝ That God will continue to open doors for sharing the Gospel with students!
- ☝ That strong student leaders will be built up for next year!
- ☝ That we will be filled with God's spiritual wisdom and understanding to reach students in '09!
- ☝ For God to provide the remaining half of our current support goal so we can devote our full energy to the campus work!
